

## **LIGHT-WEIGHT PORTABLE SAFETY WRAPER™ A BLAZE ORANGE VISUAL AID IN SITUATIONS WHERE VISIBILITY CONTRIBUTES TO RECOGNITION BY A THIRD PARTY**

Light-weight portable visual aid in blaze orange (or other color) color for location in situations where visibility contributes to visual recognition by a third party. This can be in suburban, urban and wilderness settings including, but not limited to activities such as climbing, fishing, hunting, motor boating and skiing.

The device is a blaze orange or other bright cloth panel made of one or more of cotton/nylon/rayon/synthetic cloth/metal foil/ wood fiber/glass/ plastic/ fiberglass/ composite formed into modular cloth block member or members (including triangles, squares, rectangles, and polygons) for rapid display in low visibility areas to aid in improving safety and identification by a third party.

This device is primarily designed to improve visual identification in situations where there are low visibility situations that cause a hazard. The device is designed to be light-weight and easy to deploy quickly to improve visibility in a cost effective manner and is reusable.

- **Reduced Deployment Time.**
- **Low Cost Durable Reusable System.**
- **Highly Visible Panel in Blaze Orange Color.**
- **High Strength Materials with Increased Performance.**
- **Environmentally Safe and Light-Weight Application System.**

**2. A elastic coating prefabricated web of sufficient size and bright color, comprising:**

A substantially vertically elongated web of support members forming a light weight prefabricated film having a uniform pattern of structural material formed from a one or more layers of one or more materials and equipped with a buckle, sticky lip, adhesive or Velcro™ attachment to complete a belt for trees or attach directly to an object, such as a car bumper;

A first form having a first vertical member of blaze orange or other bright color to be fixed around or on an object such as a tree, near a hunter's stand location as a visual marker (patterns may be used or printed on panel to camouflage from animals that would view the device in black and white).

A second form having a first vertical member of blaze orange or other bright color to be attached to an object such as a car, aircraft, snow mobile or other object near a person's location that is in possible danger or lost.

The attached figure is one such embodiment.

**Figure 1      Example Of 3' X 6" Safety Wrapper™ for Hunting**

**Figure 2      Example Of 3' X 6" Safety Wrapper™ for Car Breakdown (SOS)**

**I claim:**

- 1. A panel prefabricated web of sufficient size and bright color, comprising:**

A substantially longitudinally elongated web of support members forming a light weight prefabricated block having a uniform pattern of structural material formed from a one or more layers of one or more materials and equipped with a buckle, sticky lip, adhesive or Velcro™ attachment to complete a belt for trees or attach directly to an object, such as a car bumper;

A first form having a first longitudinal member of blaze orange or other bright color to be fixed around or on an object such as a tree, near a hunter's stand location as a visual marker (patterns may be used or printed on panel to camouflage from animals that would view the device in black and white).

A second form having a first longitudinal member of blaze orange or other bright color to be attached to an object such as a car, aircraft, snow mobile or other object near a person's location that is in possible danger or lost.
